

Prioritization of Vital and Strategic Products, or Products Produced for Export, for File Review and Analysis 2023

Code: EDEREX: NP.CADC.003

Version No: 1/2023

Issue Date: 27/4/2023

Effective date: 27/4/2023

The Central Administration of Drug Control (CADC) announces the introduction of a **new service that enables applicants to identify priorities for file assessment and review and analysis of pharmaceuticals, both essential and strategic, or those produced for the purpose of export**, as outlined below:

- The applicant submits a paper request to the General Administration of Technical Support, with justification, for the products to be prioritized for expedited file review and sample analysis.
- The sample progress can be tracked by following the “inquiries and complaints” procedure, and adhering to the announced sequence of the step.
- This applies to the following:
Samples of products submitted to the administration of Evaluation and Approval, or the administration of Post-approval Control.
