Unit: Technical Assessment Unit

Assessment report

Omnitrope

Administrative information:

Trade name of the medicinal product:	Omnitrope 15 mg/1.5ml
INN (or common name) of the active substance(s):	Somatropin, RH-GH 15 mg/1.5ml
Manufacturer of the finished product	Sandoz GmbH Schaftenau, Biochemiestrasse 10, 6336 Langkampfen, Austria.
Marketing Authorization holder	Sandoz GmbH, Biochemiestrasse 10, A-6250 Kundl, Austria.
Applied Indication(s):	-Infants, children and adolescents -Growth disturbance due to insufficient secretion of growth hormone (growth hormone deficiency, GHD)Growth disturbance associated with Turner syndromeGrowth disturbance associated with chronic renal insufficiencyGrowth disturbance (current height standard deviation score (SDS) < -2.5 and parental adjusted height SDS < -1) in short children/adolescents born small for gestational age (SGA), with a birth weight and/or length below -2 standard deviation (SD), who failed to show eatch-up growth (height velocity (HV) SDS < 0 during the last year) by 4 years of age
35 - ZM 113.	or laterPrader-Willi syndrome (PWS), for improvement of growth and body composition. The diagnosis of PWS should be confirmed by appropriate genetic testing. Adults

QF:BioInn.005.04 Issue/Rev. no: 7/0 Issue date: 25/12/2022 Rev. date: --/--/ Page 2 of 7

plastic mechanism with a threated rod at one extremity + Insert Leaflet.

List of abbreviations:

GHD	Growth hormone deficiency
SGA	small gestational age
PWS	Prader-Willi syndrome
I <mark>G</mark> F-I	insulin-like growth factor-I
S.C	Subcutaneous
EMA	European medicines Agency
CTD	Common Technical Document
hCH	for human growth hormone
DNA	Deoxyribonucleic Acid
CRS	Cytokine Release Syndrome
HCF	High concentrated form
BDS	Bulk drug substance
GMP	Good manufacturing practice

Dossier initial submission and evaluation process:

- The product was submitted for registration via reliance level I.
- The dossier evaluation by the registration administration units was started on 12.4.2023 after providing all the required documents (EMA list of questions for Day 120 and Day 150 along with Full CTD for the product)

1. General introduction about the product including brief description of the AI, its mode of action and indications:

Somatropin Sandoz is a recombinant human growth hormone produced in *Escherichia coli* K-12 strain MG1655, which has been transformed with the natural cDNA sequence for human growth hormone (hGH). Somatropin Sandoz is produced by fermentation of recombinant *E.coli* K-12 under the control of the PVHb promoter. Somatropin Sandoz is expressed as an N-terminal fusion protein with the signal sequence of the *E. coli* outer membrane protein A

Administration of Registration

(OmpAss), directing the protein to the periplasm with concurrent processing of the signal sequence. Somatropin Sandoz is a non-glycosylated protein composed of 191 amino acids. The three-letter sequence of the polypeptide chain, the N-terminal and C-terminal amino acids are phenylalanine. The protein molecule contains 4 cysteines, which form 2 intramolecular disulphide bonds between positions Cys53-Cys165 and Cys182-Cys189.

- The drug substance solution used for the manufacturing of Omnitrope 15 mg/1.5 mL complies with the Ph. Eur. monograph (Somatropin Bulk Solution) and has been extensively characterized and compared to the Ph. Eur. standard (Somatropin CRS). The same Somatropin drug substance is used as for the previously developed drug products Omnitrope 3.3 mg/mL and Omnitrope 6.7 mg/mL solution for injection.
- Growth hormone is released by the pituitary gland (a gland at the base of the brain). It is important for growth during childhood and adolescence, and it also affects how the body handles proteins, fat and carbohydrates. The active substance in Omnitrope, somatropin, is identical to the human growth hormone, which it replaces. Somatropin is produced by a method known as 'recombinant DNA technology': the hormone is made by bacteria into which a gene (DNA) has been introduced that makes them able to produce somatropin.
- Omnitrope is also used as replacement therapy in adult patients with pronounced growth hormone deficiency. The deficiency can have started in adulthood or childhood, and needs to be confirmed by testing before treatment.

2. Quality aspects:

• Manufacturer(s):

Drug substance:

The Somatropin Sandoz drug substance (BDS and HCF) is manufactured according to current Good Manufacturing Practices (cGMP) by Sandoz GmbH Biochemiestrasse 10 A-6250 Kundl, Austria.

Drug product:

Manufacture, release, quality control and packaging (primary and secondary packaging) of Somatropin Sandoz 15.0 mg/1.5 ml Solution for Injection is performed by Sandoz GmbH Plant Schaftenau Biochemiestrasse 10 A-6336 Langkampfen Austria;

Stability

> Approved shelf life:

Intermediates:

THE CHICATURE	
CAP.P	≤ 167
HIC.PC	≤ 24
HIC.P	≤ 23
RPC.P	≤ 48
AEX.P	≤ 24
DR.62	≤ 24
DR.62A	≤ 24

Active substance:

High Concentrated Form (HCF): 12 months

Finished product:

-18 months

-After first opening: 28 Days

Approved Storage Conditions:

Intermediates:

CAP.P	2 – 8 °C
HIC.PC	16 − 20 °C
HIC.P	2 – 8 °C
RPC.P	2-8°C
AEX.P	2 – 8 °C
DR.62	2 – 8 °C
DR.62A	2 – 8 °C

Active substance:

High Concentrated Form (HCF): Store at -20±5°C

Finished product:

- -Store & transport refrigerated between (2 -8°C), don't freeze and store in original package in order to protect from light.
- -After first use the cartridge should remain in the pen and has to be kept in a refrigerator (2°C 8°C) for a maximum of 28 days. Store and transport refrigerated (2°C 8°C). Do not freeze. Store in the original pen in order to protect from light

3. Non-clinical and clinical aspects:

GA of Biological Products
Administration of Registration

- -The applicant submitted an adequate nonclinical according to the applied guidelines and is considered acceptable from the preclinical point for the proposed indication.
- In conclusion the overall benefit/risk of Omnitrope 10 mg/ml (15mg/1.5 ml) is favorable in the treatment all indication mentioned above for children and adult.
